

This technical drawing shows a detailed cross-section of a mechanical assembly. The assembly includes a central vertical shaft (1) with a nut and washer at the top. A piston or plunger (2) is connected to the shaft via a connecting rod (3). The piston is seated within a cylinder (4). A spring (5) is located at the bottom of the cylinder. A valve or plug (6) is positioned on the right side of the cylinder. A large, curved component (7) is on the left, possibly a cam or a guide. A dimension line at the bottom indicates a length L. Various other components are labeled with numbers 8 through 25, 30 through 35b, and 32. Some numbers are repeated, indicating multiple instances of a part. The drawing uses hatching to represent different materials and dashed lines to show internal features or assembly paths.
